

Atego Rigid range.

Mercedes-Benz
Trucks you can trust

The Mercedes-Benz Atego Rigid range.

The Mercedes-Benz Atego Rigid range impresses not only with a comfortable driver workplace, but also with precisely coordinated, job-matched vehicle configurations, impressive fuel savings compared with its predecessor*, efficient technology and attractive service offers which increases the overall effectiveness further still.

Reliability. Operators who earn their money in road-bound goods transport need reliability. In other words: trucks they can count on. With the Atego Rigid range we are able to offer you a vehicle incorporating the rich fund of experience and expertise acquired over more than 100 years of German engineering. Equipped with leading Mercedes-Benz vehicle technology and components tested under tough conditions. This applies to engines, gearshifts, transmissions and drive axles as well as frames, chassis, suspension and cabs. Everything is perfectly coordinated, in order to meet requirements reliably, even in extreme conditions.

Efficiency. Mercedes-Benz Trucks stand for particularly high economic efficiency worldwide. The Atego Rigid range also meets the highest standards of efficiency, based first and foremost on its particularly low fuel consumption*. Low wear generally affords a vehicle a higher resale value which is an additional merit contributing to overall economic efficiency. Numerous innovative technical measures were implemented in the course of developing these vehicles, resulting in higher performance engines with lower fuel consumption*, a powertrain which enables a particularly economical driving style, and an aerodynamic design honed down to the finest details in the interest of fuel efficiency.

Versatility. Distribution transportation has its very own set of rules. This is why we have created the Atego Rigid range, for distribution transportation from 12 to 16 t, to ensure that you are ideally placed to meet the challenges facing this sector. Our Atego Rigid range of models mean you have the perfect vehicle to meet the demands associated with distribution transport, general freight and other high volume transport requirements.

ClassicSpace S-cab, or S-cab Extended, 2.30 m, tunnel.

The comfortable 2300 mm-wide cab offers the driver an ergonomic, comfortable workplace and is ideally designed to meet the requirements of local distribution.

ClassicSpace L-cab, 2.30 m, tunnel.

The comfortable 2300 mm-wide cab offers the driver an ergonomic, comfortable workplace and is ideally designed for distribution transport while offering the feature of a bunk or a bench seat for 4 additional passengers.

Consumption. The economical Euro VI engines are available in two displacement classes 5.1 l and 7.7 l with a total of 3 power output ratings from 170 kW (231 hp) to 220 kW (299 hp). In conjunction with the precisely tuned powertrain configurations and the sophisticated aerodynamics, the Euro VI Mercedes-Benz engine achieves significant fuel savings* compared with predecessor models.

Equipment Highlights.

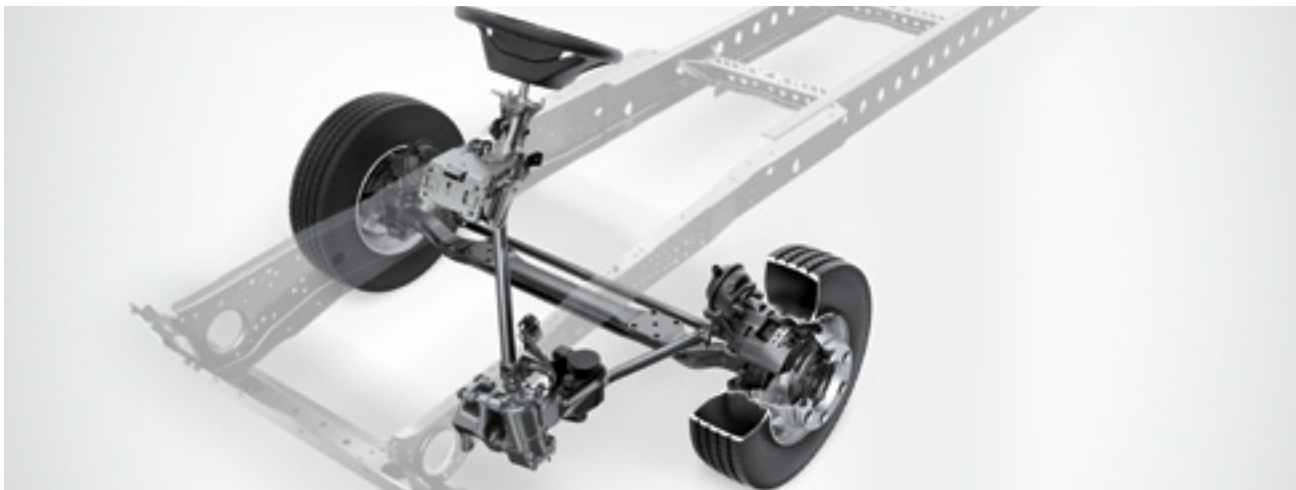

Powertrain. Mercedes PowerShift 3 provides fast shifting from forward to reverse and high-ratio reverse gears for easy manoeuvring. Moving off is noticeably more comfortable thanks to the crawl function.

Rear axle guide. The innovative rear axle guide also plays a decisive role in the excellent handling: compared with a conventional wishbone, the connection points of the two trailing arms are positioned further towards the outside. This results in outstanding transverse stability, little need for corrective steering and very good understeer/oversteer characteristics.

Tank capacity. Atego Rigid range models are equipped with a tank capacity of 325 litres. They can be optioned with a second 325 litre tank. This makes for a long operating range and saves money by avoiding the need to retro-fit add-on tanks.

Suspension components. All the suspension elements in the Atego Rigid range are precisely tuned to one another: from the seats to the cab mountings to the air suspension at the rear axle – the overall result is a high degree of suspension comfort for the workplace and a ride which helps protect both the vehicle and its cargo.

Easy body-mounting capabilities. Features contributing to the high body-mounting ability include the parameterisable special module, which simplifies connection options, integration and operation of the body substantially. A host of measures additionally help to ensure that the Atego Rigid range is delivered to you sooner and up and running more quickly – from the optimised layout of all components on the frame to numerous factory-fitted pre-installations.

Total Cost of Ownership.

Maintenance.

The information displayed in the cockpit provides you with advance warning about when your vehicle's next scheduled maintenance visit is due. This is determined on the basis of the continuous evaluation of data about the actual workload of the vehicle: for example, every single cold start, the degree of brake pad wear, the condition of the engine oil and all major assembly oils. In this way, maintenance can be planned anticipatively and can be combined with statutory inspections for example. This is intended to minimise additional downtime.

Mercedes-Benz Genuine Parts.

High-quality genuine parts at an affordable price are generally an attractive feature that may assist in maximising resale value. The extensive range of parts, efficient logistics and quick availability across the country are further advantages. Mercedes-Benz also offers a range of genuine remanufactured parts that can reduce costs without comprising quality.

Ease of repair.

Right back at the design stage, care was taken to ensure that all the components are not only particularly robust, but can also be replaced or repaired particularly quickly and cost-effectively if necessary. For lower costs and higher efficiency.

Mercedes-Benz Service Plans.

Whether you operate one truck or a large fleet, planning your operating costs is imperative. Our Mercedes-Benz Service Plans are designed to protect your vehicle and your business by reducing unexpected operating costs. Through our Service Plans, the Mercedes-Benz Truck authorised dealer network carries out maintenance and repairs according to an agreed schedule and predetermined costs tailored to your specific requirements.

Benefits include:

- Improved operational reliability
- Vehicle fully maintained according to factory standards
- Increased uptime
- Nationwide service network
- Less administration
- Help protect the resale value of your vehicle

Star Driver. The Mercedes-Benz Star Driver Program is a locally developed initiative which allows you to take full advantage of your vehicle's outstanding capabilities. When you purchase your new Mercedes-Benz Truck, you will have access to the program, providing you with one-on-one sessions designed to give you a full understanding of your vehicle's true capabilities, and how you can maximise its efficiency, safety and performance.

Mercedes-Benz Finance and Insurance.

Benefit from competitive interest rates, various contract terms, and efficient credit decision and documentation processes. We are a specialised truck financier and can tailor finance and insurance packages to suit your unique budgeting and cash flow requirements*.

* Mercedes-Benz Financial Services New Zealand Ltd. credit assessment and lending criteria apply.

Engines and Cabs.

6-cylinder in-line, 5.1 l displacement

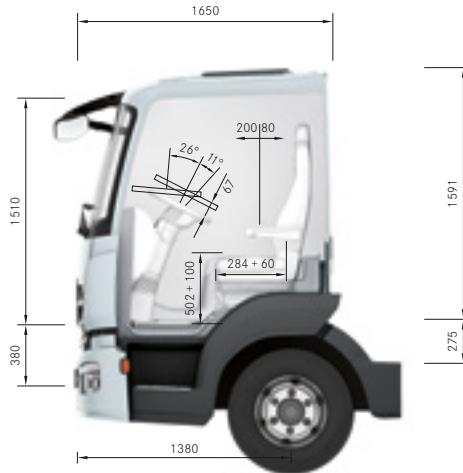

kW (hp)	Nm
at 2200 rpm	at 1200-1600 rpm
170 (231)	900

6-cylinder in-line, 7.7 l displacement

kW (hp)	Nm
at 1600 rpm	at 1100 rpm
220 (299)	1200

ClassicSpace S-cab
(exterior width 2300 mm, engine tunnel)

Headroom in front of seats: 1510 mm

ClassicSpace S-cab Extended
(exterior width 2300 mm, engine tunnel)

Headroom in front of seats: 1510 mm

ClassicSpace L-cab
(exterior width 2300 mm, engine tunnel)

Headroom in front of seats: 1510 mm

BigSpace L-cab
(exterior width 2300 mm, engine tunnel)

Headroom in front of seats: 1510 mm

Advantages at a glance.

Drivetrain:

- Mercedes-Benz OM 934 5.1 litre engine and OM936 7.7 litre engine options
- Fully automated 6 and 8 speed Mercedes-Benz PowerShift 3 transmission
- Fuel efficient single reduction axles
- Electronic Braking System incorporating Stability Control Assist, Hill Hold Assist and Traction Control

Cab:

- Extended cabs for day to day operation
- Sleeper cabs for additional comfort
- High roof sleeper cab with bench seat for up to 6 occupants
- Double zinc coated and cathodic dip priming for optimal corrosion protection
- Ergonomic cabs designed with the driver's needs in mind
- Aerodynamically tested and designed for optimal efficiency on the road

Value Add Services:

- 1 year, unlimited km bumper to bumper warranty
- Up to 3 year/250,000 km[^] driveline warranty

[^] Whichever occurs first. Mileage limit is from new.
